

ABLE DESIGN INTRODUCES NEXT GENERATION AUTOMATED SD/MMC AND CF FLASH LABEL APPLICATORS AT THE FLASH MEMORY SUMMIT

NEW M1052 AND M1062 AUTOMATED LABEL APPLICATORS ARE SHIPPING

Mountain View, CA – July 5, 2006 – Able Design (www.abledesigninc.com) announced today that it will introduce their new M1052 automated SD/MMC label applicators and the new M1062 automated CF label applicators at the FLASH MEMORY SUMMIT in San Jose, August 8 – 10, 2006. Units are now shipping. These new products are another example of Able Design's expertise in automated device handling product development. Able Design improves on its award winning design with improved accuracy, throughput, and ease of use in the new Model 1052 automated SD/MMC label applicator and the new M1062 automated CF label applicators.

Besides a small desktop footprint, high reliability, and low maintenance design, requiring no air compressor and fragile suction cups, the award winning design now includes the next generation, high performance PLC and a bright LCD graphics display. The added intelligence and graphics display simplifies setup and maintenance, reducing the total cost of ownership.

“We've listened to our customers and simplified the setup and maintenance process using a menu driven LCD interface” said John Meadows, Able Design President and Chief Engineer. “With the new M1052 and M1062 units, our customers can easily and quickly setup and adapt their equipment for different label and device specifications.”

The versatile Able Design M1052 Automated Labeler also supports RSMC FLASH devices via an optional kit. The small 12.5” x 18.7” footprint makes the M1052 and M1062 easy to place into a cell based manufacturing facility. The M1052 and M1062 Automated Label Applicators are manufactured at Able Design headquarters in Mountain View, CA and is distributed worldwide.

ABOUT ABLE DESIGN INC.

Able Design Inc. is an accomplished automation company that has become a leading provider of FLASH memory label applicators for the FLASH memory markets. Their label applicators support all types of FLASH devices including SD, MMC, CF, and PCMCIA memory cards. Customers include leading manufacturers of FLASH memory cards such as SanDisk, SimpleTech, PDP Systems, and Dane-Elec. The company also provides custom mechanical design services and a wide variety of CD/DVD printing and duplication equipment. Able Design Inc. has over 20 years of experience in developing and manufacturing industrial-grade automation equipment.

Able Design Inc. headquarters:
2277 Old Middlefield Way, Mountain View, CA 94043 USA.
