OCZ TECHNOLOGY TO SHOWCASE ITS LATEST ENTERPRISE STORAGE SOLUTIONS AT FLASH MEMORY SUMMIT 2012

2012-08-20

Advanced Solid-State Drives and Linux-Based Acceleration Software Featured in Booth #208, Santa Clara Convention Center

SAN JOSE, CA - Aug 20, 2012 - OCZ Technology Group, Inc. (NASDAQ: OCZ), a leading provider of high-performance solid-state drives (SSDs) for computing devices and systems, will showcase its latest storage products, encompassing a mix of both solid state drives and software solutions, at this year's Flash Memory Summit, Booth #208, Santa Clara Convention Center, Santa Clara, California, from August 21st through August 23rd.

Demonstrating SSD products along with recent partner implementations, OCZ will showcase a comprehensive lineup of innovative solutions for business, storage, server, and OEM clients. This includes product presentations of both the impending Intrepid 3 SATA III-based SSD solution based on the company's Indilinx Everest 2 architecture, along with its leading PCI Express (PCIe)-based Z-Drive R4 featuring new Linux Acceleration software (LXL), a standalone solution for Linux-based servers in non-virtualized IT storage and server environments. By utilizing an innovative cache architecture running in the Linux kernel itself, LXL minimizes latency while maximizing performance and supports all OCZ enterprise-class SSD drives and interfaces including PCIe, SAS and SATA. Included in the LXL software demonstration is Z-Verse, OCZ's new central management application for all OCZ enterprise SSDs including Z-Drive R4 for PCIe, Deneva 2 for SATA III and Talos 2 for SAS.

Other booth demonstrations will include VXL, OCZ's cache and flash virtualization software for VMware environments running its flash virtualization feature for SQL Server 2012 databases using its leading Z-Drive R4 PCIe SSD against a traditional SAN array. This combined hardware/software solution dramatically increases SQL Server 2012 transactional IOPS performance, reduces database read latencies, and improves query completion times. The VXL live demo will include a VDI boot storm through a warm-up cache, and vMotion and Fault Tolerance to showcase a complete High Availability (HA) solution using flash virtualization, both of which are OCZ-only unique features. Lastly, OCZ will also demonstrate its popular Talos2 Series SAS-based drives showcasing the performance advantages of a true full duplex, dual-port SAS 6Gb/s SSD in a Microsoft Cluster in a Box (CiB) solution, further leveraging the strengths of OCZ's storage drives when paired with leading partner systems.

As a complete solution provider for the enterprise, offering both leading edge storage hardware and complementary software products, OCZ continues to deliver enterprise-class solid-state solutions with higher endurance, cutting edge performance, increased reliability, unparalleled security and reduced total cost of ownership (TCO) for large scale data centers and IT infrastructures worldwide. Join OCZ Technology at this week's FMS 2012 to see the latest drives, software, and partner solutions designed for enterprise server and storage customers.

About OCZ Technology Group, Inc.
Founded in 2002, San Jose, CA-based OCZ Technology Group, Inc. (OCZ) is a global leader in the design, manufacturing, and distribution of high-performance solid-state storage solutions and premium computer components. Offering the industry's widest range of solid-state drives (SSDs), OCZ features SSDs in a variety of form factors and interfaces (i.e. PCIe, SAS and SATA) to address HDD replacement, SAN acceleration, server and storage virtualization, cloud computing, and virtual desktop infrastructure (VDI) opportunities. Having developed firmware and controller platforms to virtualization and endurance extending technologies, the company delivers vertically integrated, customizable solutions enabling transformational approaches to how digital data is captured, stored, accessed, analyzed and leveraged across a wide range of client and enterprise applications. Forward Looking Statements
Certain statements in this release relate to future events and expectations and as such constitute forward-looking statements involving known and unknown factors that may cause actual results of OCZ Technology Group, Inc. to be different from those expressed or implied in the forward-looking statements. In this context, words such as "will," "would," "expect," "anticipate," "should" or other similar words and phrases often identify forward-looking statements made on behalf of OCZ. It is important to note that actual results of OCZ may differ materially from those described or implied in such forward-looking statements based on a number of factors and uncertainties, including, but not limited to, market acceptance of OCZ's products and OCZ's ability to continually develop enhanced products; adverse changes both in the general macro-economic environment as well as in the industries OCZ serves, including computer manufacturing, traditional and online retailers, information storage, internet search and content providers and computer system integrators; OCZ's ability to efficiently manage material and inventory, including integrated circuit chip costs and freight costs; and OCZ's ability to generate cash from operations, secure external funding for its operations and manage its liquidity needs. Other general economic, business and financing conditions and factors are described in more detail in "Item 1A -- Risk Factors" in Part I in OCZ's Annual Report on Form 10-K filed with the SEC on May 14, 2012, and statements made in other subsequent filings. The filing is available both at www.sec.gov as well as via OCZ's website at www.ocztechnology.com. OCZ does not undertake to update its forward-looking statements.
