

NxGn Data to Present at Flash Memory Summit 2014

NxGn Data will present at Flash Memory Summit 2014 about In-Situ Processing and M.2 SSDs for Enterprise Applications

IRVINE, Calif.—August 4, 2014—NxGn Data, Inc., a developer and producer of a new generation of **Intelligent SSD Solutions** for enterprise applications, today announced it will present a technical paper and a tutorial at the Flash Memory Summit, held August 5-7, 2014 at the Santa Clara Convention Center, Santa Clara, California.

The paper presented by Dr. Vladimir Alves will discuss NxGn Data's In-Situ Processing capability and how this revolutionary approach will take "Compute to Data" cost effectively.

- Session 202-E: New Approaches to Flash Control (Controllers Track)
- Title: In-Situ Processing to Bring Intelligence to Storage
- Presenter: Vladimir Alves, Ph.D., Co-Founder & CTO
- Time: Wednesday, August 6 from 9:45AM - 10:50AM PDT

The tutorial by Mr. Richard Mataya will discuss the challenges of designing M.2 SSDs optimized for Enterprise Applications.

- Tutorial T-4: (Tutorials Track)
- Title: Selecting the Right Enterprise SSD: Featuring the M.2 Form Factor
- Co-Presenter: Richard Mataya, Co-Founder & SVP
- Time: Wednesday, August 6 from 4:30PM – 5:45PM PDT

Brian A. Berg, Flash Memory Summit Technical Chair and President of Berg Software Design, said "The M.2 form factor is creating new opportunities for product differentiation in the enterprise SSD market segment. NxGn Data is seizing the opportunity with their controller design and intelligent architecture that enables efficient use of MLC and TLC NAND for product differentiation."

About NxGn Data, Inc.

Founded in mid-2013, with offices in Irvine, CA & Hsinchu, Taiwan, NxGn Data is a privately held company focused on the design and manufacturing of a new generation of **Intelligent SSD Solutions**. The company is led by Nader Salessi, Founder & CEO, Vladimir Alves, Co-Founder & CTO, and Richard Mataya, Co-Founder & SVP SSD Solutions. These three SSD industry veterans have worked together for over a decade at companies such as Western Digital, STEC, and Memtech in various executive capacities and have helped drive and shape the industry during this period of rapid growth and expansion.
