

## DIABLO CEO DELIVERS KEYNOTE ADDRESS AT FLASH MEMORY SUMMIT

**San Jose, Calif. – August 10, 2015** – Riccardo Badalone, Chief Executive Officer and Co-Founder of Diablo Technologies, will deliver a keynote address titled “Disruptive Memory Technology Enables New In-Memory Applications” at the Flash Memory Summit, August 11 at 2:30 p.m. PDT. Diablo will also be showcasing its newly announced Memory1™, the first all-flash system memory product, in booth #413 at the Santa Clara Convention Center in Santa Clara, Calif. August 12-13.

On public display for the first time, Memory1 leverages the cost and capacity advantages of flash to provide economical system memory for large-scale datacenter and hyperscale customers. Packing four times the capacity of the largest DRAM modules, Memory1 delivers greater capability on fewer servers and lowers datacenter costs by up to 70 percent. Memory1 is ideal for environments that require large memory footprints for workloads such as big data analytics and complex web applications.

Flash Memory Summit showcases the emerging technologies and leading vendors that are driving the multi-billion dollar, non-volatile memory and SSD markets. Flash Memory Summit is now the world’s largest event featuring the trends, innovations, and influencers driving the adoption of flash memory in

demanding enterprise storage applications. Additional information about the show is available at <http://www.flashmemorysummit.com/>.
