Media Alert:
Virtium to Join Panel on Solid-State Storage for Industrial/Embedded Internet of Things at Flash Memory Summit

Virtium's VP of marketing, Scott Phillips, will join the panel on flash-based storage and the Internet of Things (IoT) at the upcoming Flash Memory Summit (FMS). His presentation, titled ***Solid State Storage Solutions for Industrial/Embedded IoT Applications***, will highlight the global IoT landscape, IoT trends and design considerations, and purpose-built solid-state drives (SSDs). Also presenting during the session will be experts from EmBestor Technology, GlobalFoundries, and Maarki.

What: Virtium presentation on SSDs in embedded/industrial IoT applications

Where: Flash Memory Summit, Santa Clara (California) Convention Center

When: August 11, 2016, 4:00-5:15 p.m. (see full conference session schedule)

Of note: Virtium is a Bronze Sponsor of this year's FMS.

About Virtium
Virtium is a leading supplier of industrial-grade memory and storage solutions for the world's top embedded-product OEMs. For two decades, Virtium has designed and built its products in the USA, fortified by a network of global locations. Virtium's world-class technology and unsurpassed customer support result in superior industrial/embedded solutions for an interconnected world.

For information on Virtium's broad portfolio of solid-state storage and memory solutions, visit www.virtium.com, call 888.847.8486 or email sales@virtium.com.
