

## Migo Beer and Pizza Shoot-Out

### 3 Key Points:

- Computer coordination/replacement is the next killer app of flash.
- Your data needs to fit in your pocket, but your keyboard doesn't.
- We all carry some of our important data with us every day (our wallet or purse.) Flash is the missing piece in having ALL of your important data with you.

# Migo Beer and Pizza Shoot-Out

## 3 Best Sources of Information:

- Gartner
- IDC
- Engadget.com

## 3 Questions We Hope Get Asked:

- Why did Windows stop with “A computer on every desktop?”
- Why is flash ideally suited for the multi-computer environment?
- To whom do we talk to about a licensing deal? (David Wainwright, [dwainwright@migosoftware.com](mailto:dwainwright@migosoftware.com))
