

The Many Flavors of NAND ... and More to Come

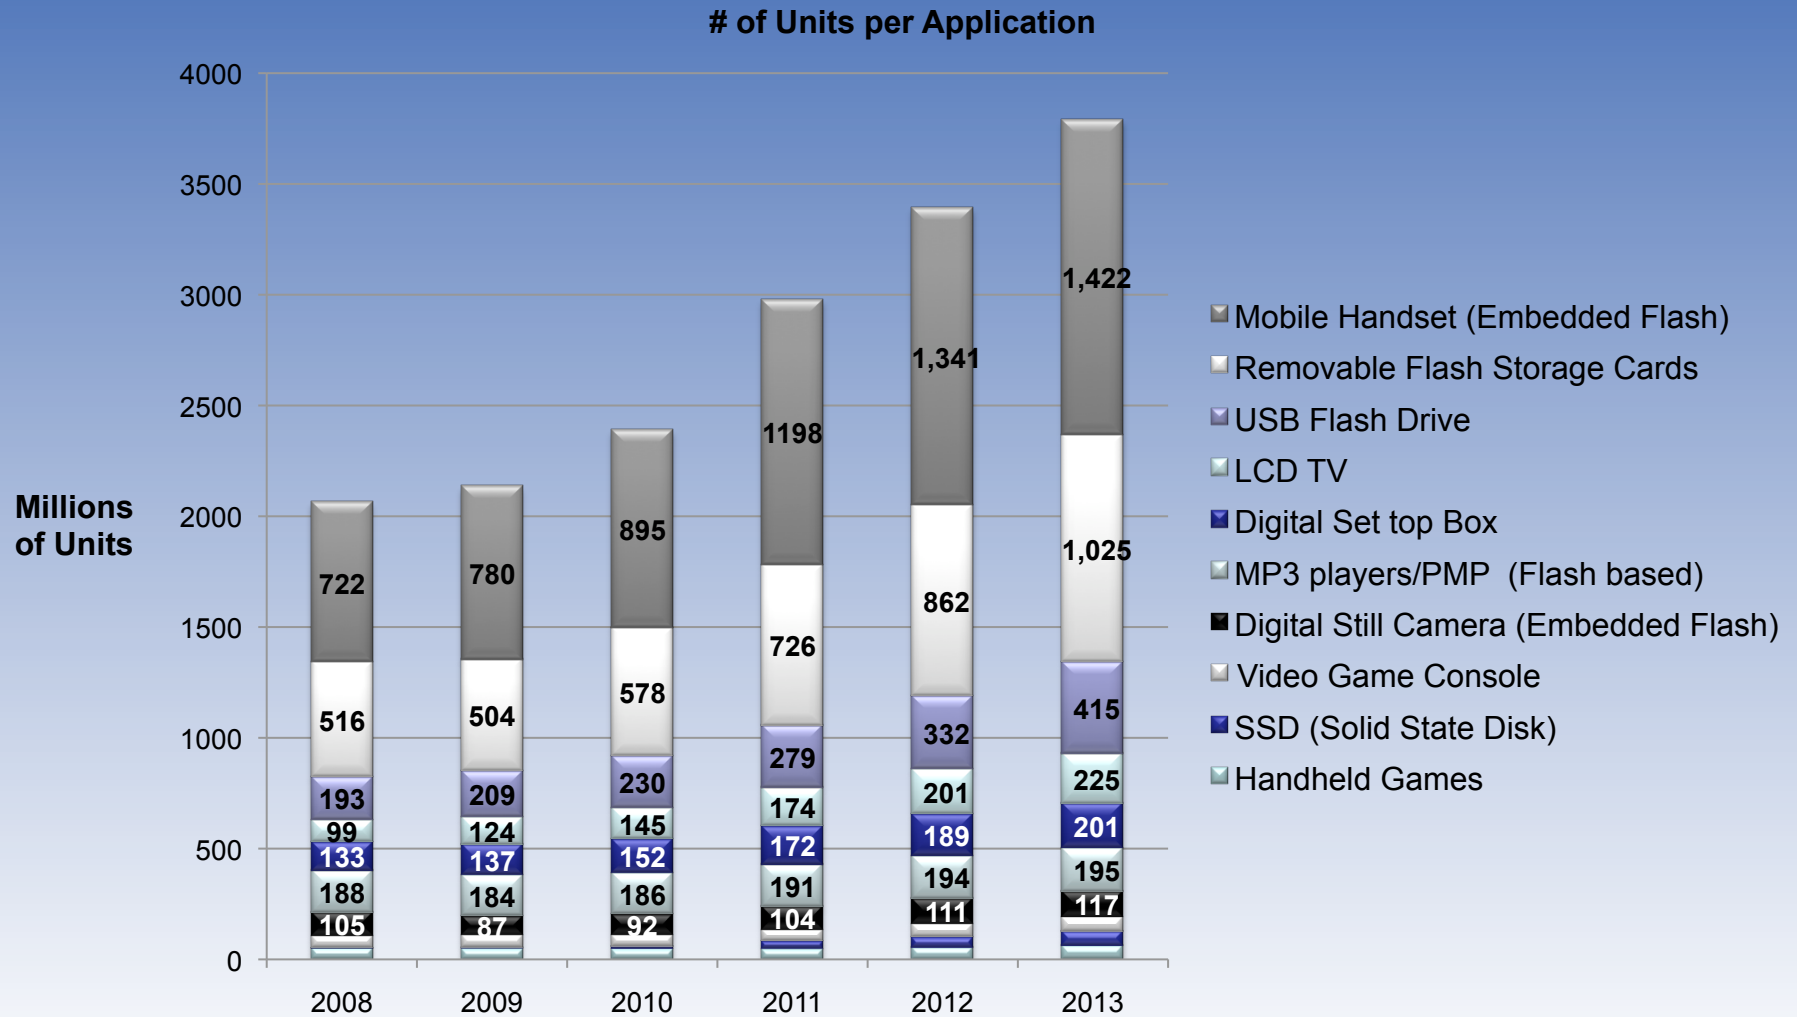

Brian Shirley
VP Micron Memory Product Group

NAND Market Growth Drivers

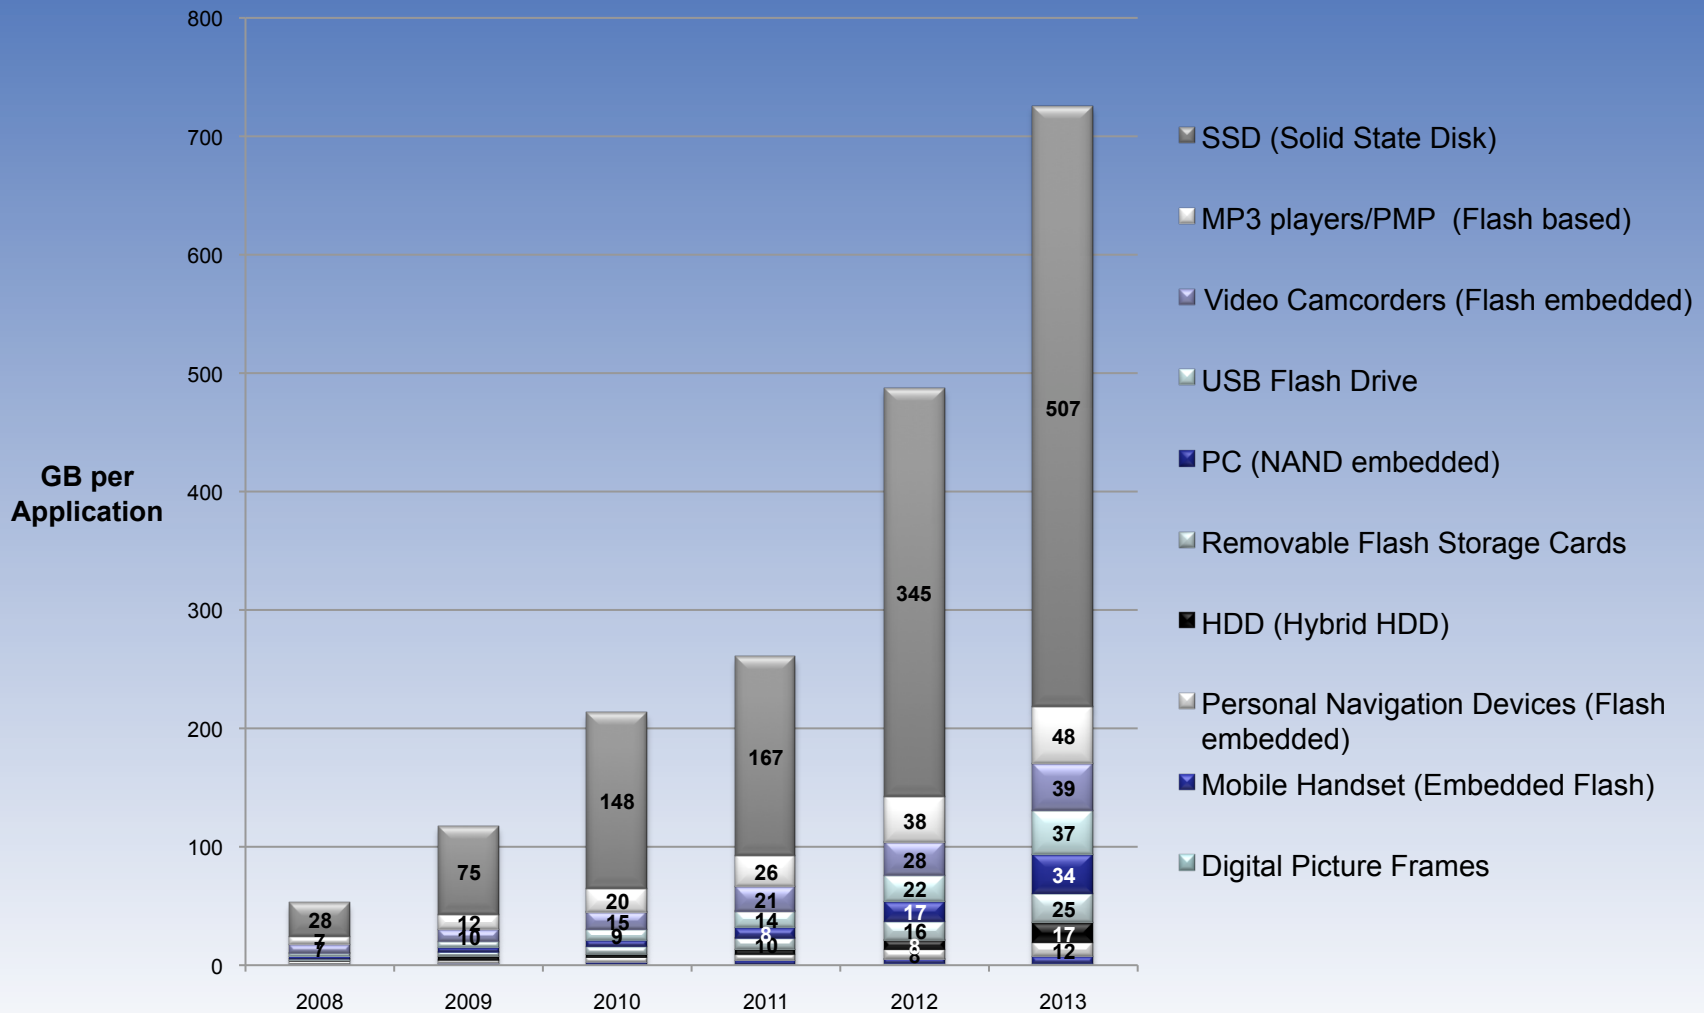

Santa Clara, CA USA
August 2009

Top 10 Applications by Units Shipped

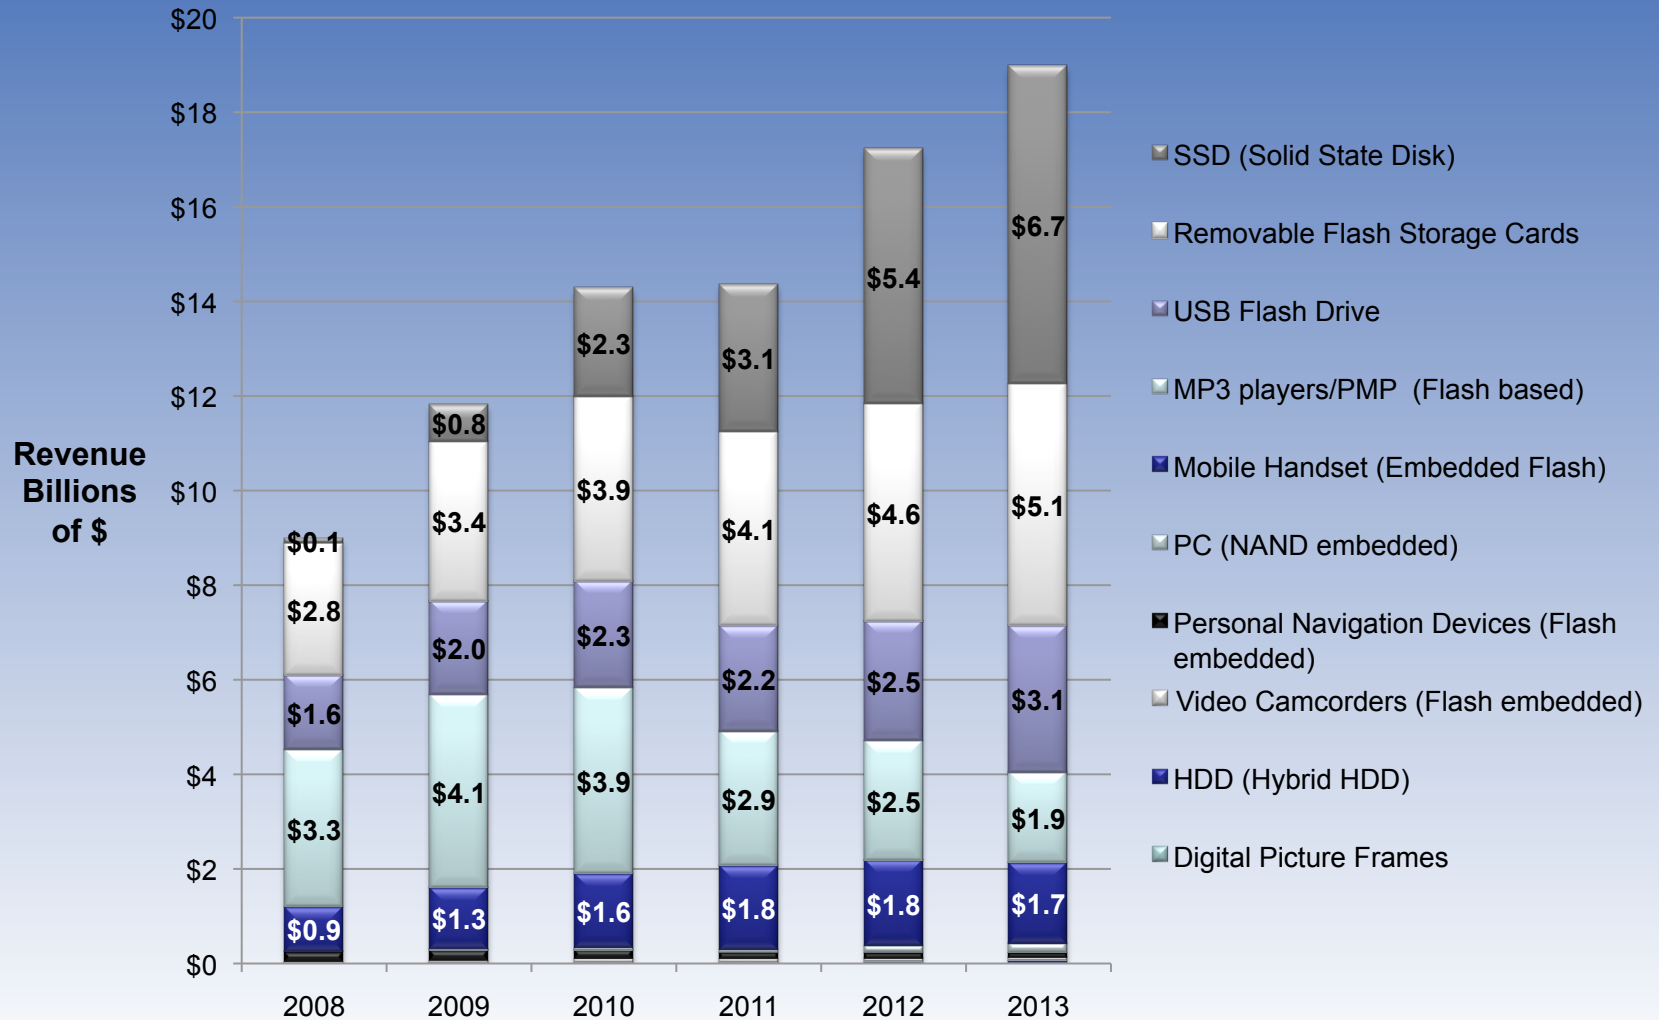

Top 10 Applications by Gigabytes

Flash size (GB / Application)

Top 10 Applications by Revenue

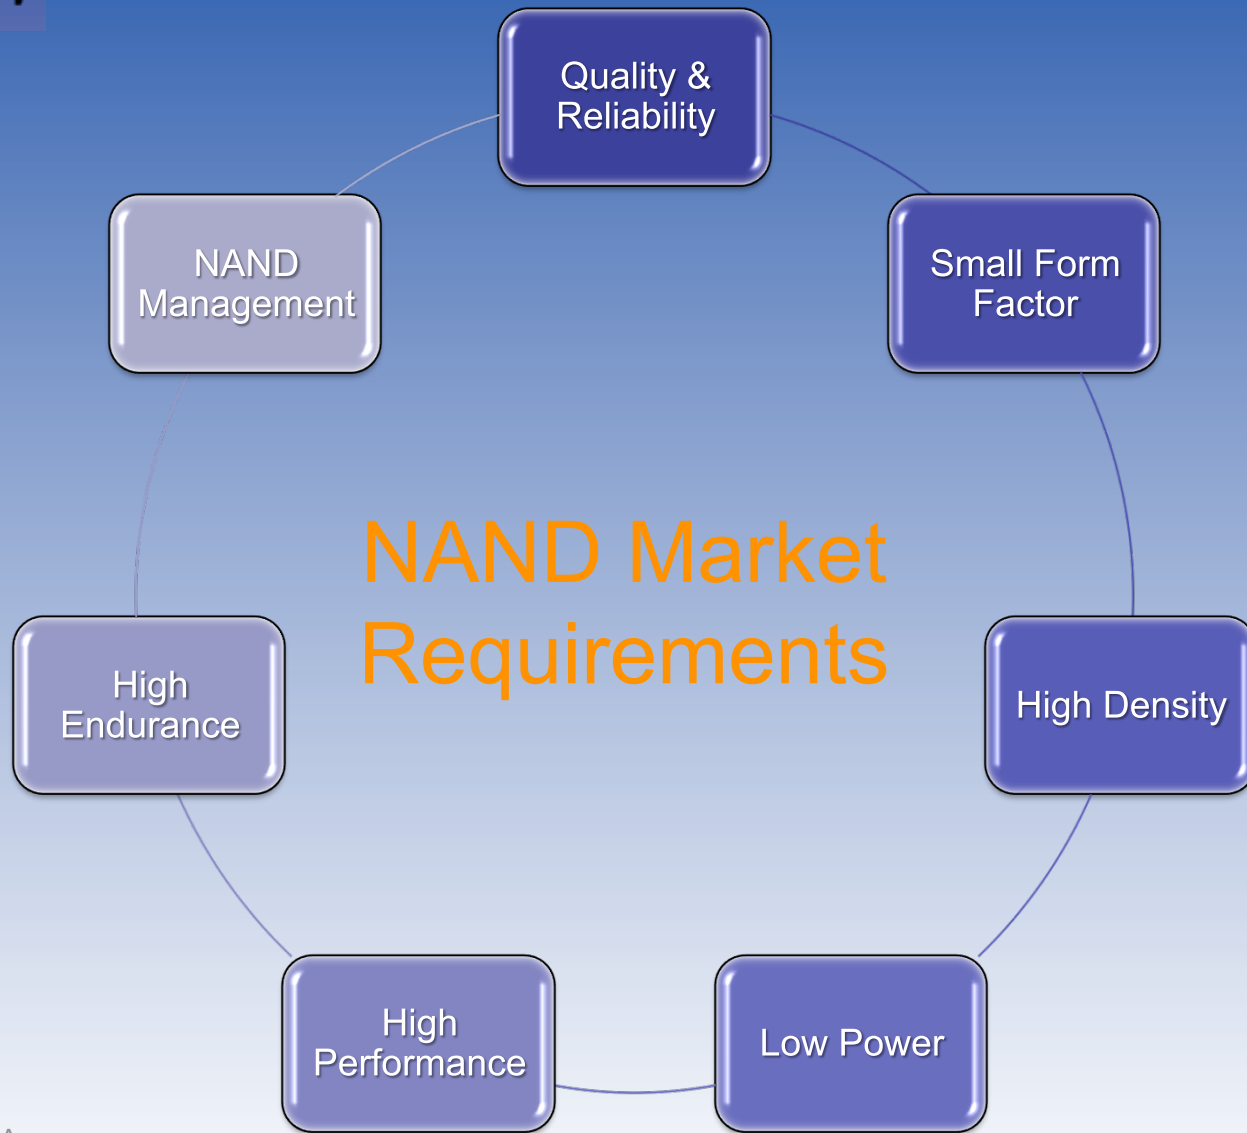

Flash Revenue by Application

Matching NAND to the Application

Santa Clara, CA USA
August 2009

NAND Application Requirements

Mobile & Consumer Electronics

- Small Form Factor
- Low Power

Notebook (SSDs & Embedded)

- High Density
- Low Power

Enterprise Storage

- High Endurance
- High Performance
- Quality & Reliability

NAND management is increasingly critical to all

NAND Technologies

SLC NAND

- **Target apps:** Enterprise storage & code storage
- **Features:** High-Performance, High-Endurance

2-bit/cell NAND

- **Target apps:** Notebook SSDs & consumer applications
- **Features:** High-Density, Lower-Cost than SLC

3-bit/cell NAND

- **Target apps:** Flash cards & USB drives
- **Features:** Highest Density, Lowest Cost

NAND Solutions

High-Speed NAND

- **Target apps:** SSDs, USB 3.0 & Disc Caching
- **Features:** ONFI 2.1 synchronous (DDR) interface, reaching speeds of up to 200 MB/s

Enterprise NAND

- **Target apps:** Servers, Storage & Networking
- **Features:** Achieves 10x improvement in endurance compared to standard NAND

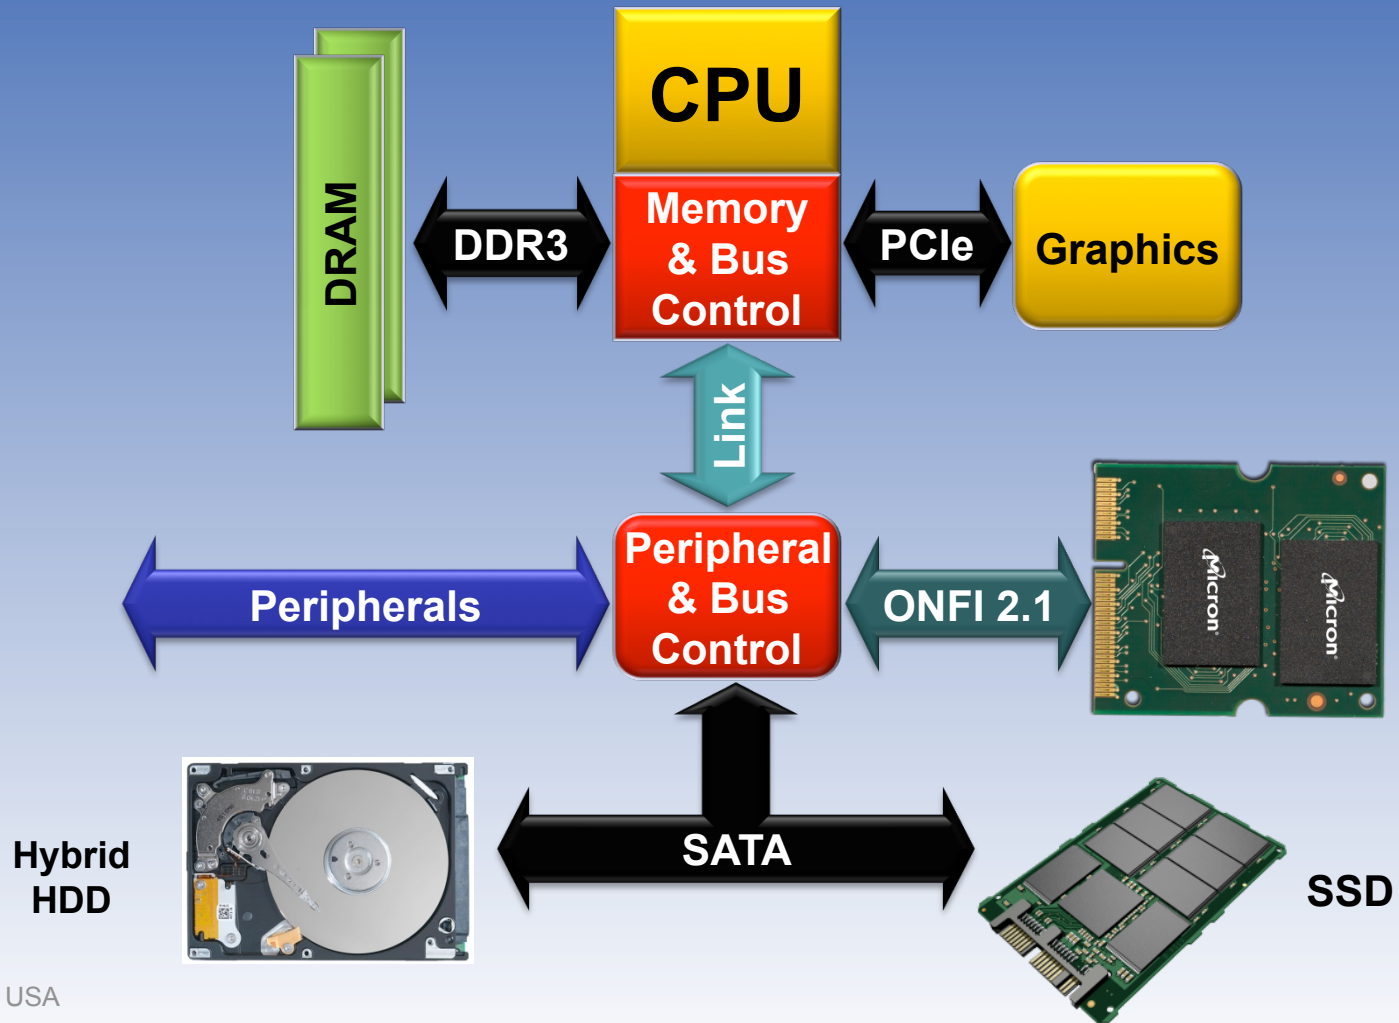

Managed NAND

- **Target apps:** Mobile and Consumer Electronics
- **Features:** On-board controller handles NAND management functions

Serial NAND

- **Target apps:** Lower Density Embedded & Consumer
- **Features:** Compatible with SPI interface

NAND in the PC

NAND Process Trends

Santa Clara, CA USA
August 2009

NAND Process Technology

NAND Flash Cross-Sections

A Look at NAND Scaling

How long can floating gate tread water?

NAND Scaling: Approaching Atomic Dimensions

Scanning tunneling microscope image of a silicon surface showing 10nm is ~20 atoms across

- NAND production state of the art is ~34nm
- 2Xnm NAND development in progress

NAND Technology Transition

Floating Gate

Charge Trap Memory

Emerging Non-Volatile Memory Technologies

What are we going to call this
conference in 5 years?

Near-Term NAND Solution: 3D Cell

- 3D techniques already developed in DRAM
- Epitaxial TFT NAND

- Vertical NAND String

- Polysilicon TFT NAND

Emerging Non-Volatile (Non-NAND) Memory Technologies

Ferroelectric RAM

Magnetic RAM

Phase Change RAM

Resistive RAM

Cross Point Memory

Summary

NAND Market Continues to be Fueled by Consumer & Computing/SSD Applications

Market Diversification: One Size Does Not Fit All

NAND Scaling Will Become Increasingly Complex in the Coming Years

In Five Years, We Are Still Going to Call this Conference the Flash Memory Summit
