

Forum G-12: Enterprise Applications, Part 2

Lee Caswell, NetApp

Beth Joseph, HP & Amandeep Singh, Jive Software

Derek Leslie, SolidFire & Mitul Patel, Endicia

George Symons, Gridstore

Ivan Iannaccone, HP

Jim Jonez, Dot Hill

Chairperson: Jean Bozman, Neuralytix

Key Themes in this Session

- Flash Adoption is Increasing in the Data Center
- Flash in servers, storage devices, converged systems, all-flash arrays (AFAs) and hybrid flash arrays (HFAs)
- Using flash for enterprise applications reducing processing time – and reduces data-center “footprints,” improving space utilization
- Examples of workloads that benefit: Database, analytics, high performance computing (HPC)
- Real-world customer deployments show ROI and Opex benefits
