

TAMING THE FIREHOSE OF MEDIA FILES

Sam Bogoch, CEO, axle Video
sam@axlevideo.com

● Pro video cameras, DSLRs and Action Cams are a global market totalling over **\$10 billion/year**.

● Video footage accounts for about **100 Exabytes per year of new storage**, approximately 7 percent of the total storage sold worldwide for any reason.

1 **Exabyte** = 1,000 Petabytes
1 Petabyte = 1,000 Terabytes

axle Cam™ - Taming the Firehose

Learn how Meg Hanley uses axle to manage a large, online video library without an IT staff.

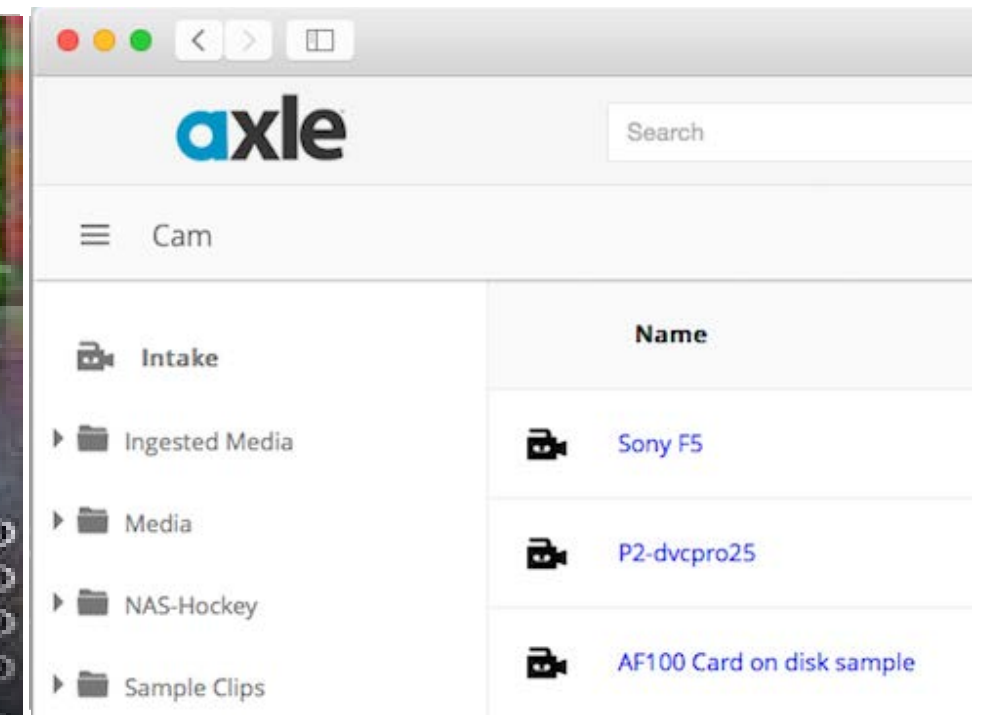

Learn how Craig Reed uses axle to power Berklee Online's groundbreaking music education.

What does Cam do?

- Rewraps high-res video clips
- Generates low-res H.264 proxies
- Cleans up clunky folder structures
- Creates an additional copy of media
- Moves incoming media into a catalog
- Makes all clip metadata easy to search
- Allows subclipping and commenting media
- Enables review and approval via browser
- Simple export to editors (FCP 7, X, Adobe)
