NAND dominates Flash landscape, yet NOR continues finding its niche. . .

Turning around for NOR Flash Market

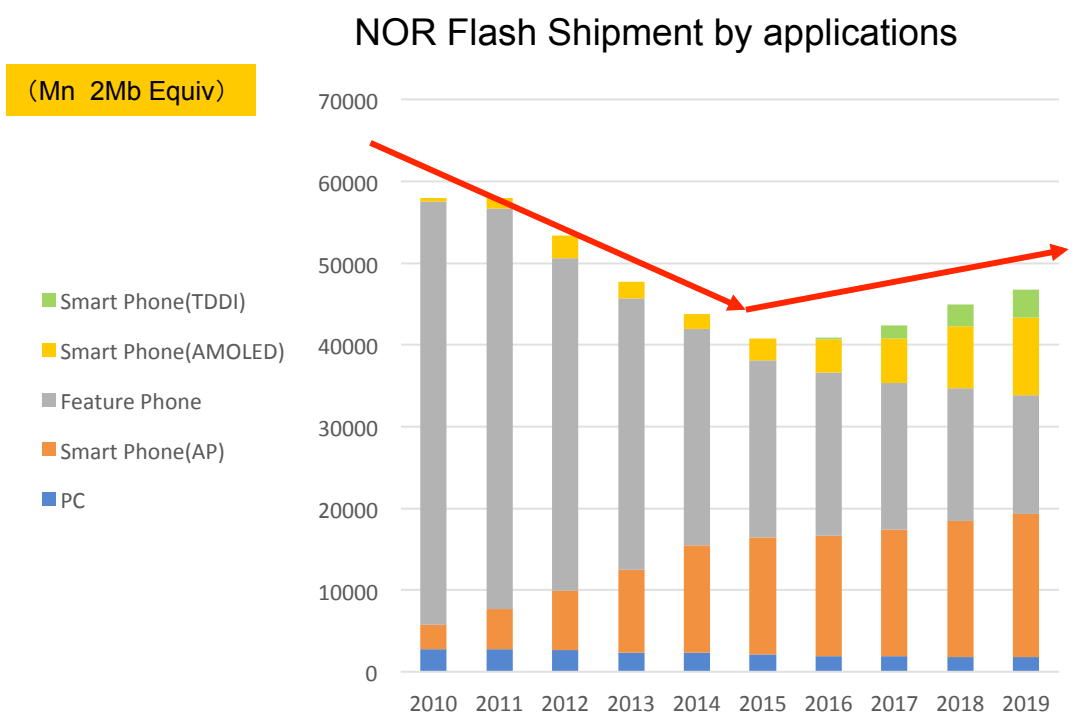

- Downward of traditional Market slow down in 2015
- Now we have cross “V” wave and back to ramp

Rapid Growing of GigaDevice

- 2017 top 10 IC design companies in China
- Top 500 listed companies in China
- Current company market value at ~USD \$5B
- Total employees: 450+, 60% in R&D, Revenue >USD \$720K per employee
- Filed 800+ patents with 323 patents granted

No. 1 NOR Flash Supplier of Mainland China

Takeaway Messages

1. NOR was once the main Flash till feature phone years. As NAND Flash dominates in smart phone and SSD in data storage era, NOR continues to find its niche in various applications, as the indispensable code memory in every embedded system.
2. IoT, smart phone modules and automotive applications drive the NOR Flash ramping up again, both in revenue and in unit counts.
3. Suppliers from Greater China are leading the NOR Flash production and market share. GigaDevice is one of leading NOR Flash suppliers in the world and the largest NOR Flash supplier from mainland China.
