

Flash Memory Summit

Flash: The IDEAL Cloud Solution

Eric Herzog

IBM Storage

CMO & Vice President of Global Channel Sales

Santa Clara, CA
August 2019

The Hybrid Multicloud World

85% of companies operate a
Hybrid multicloud environment

91% of public cloud adopters use **internal private cloud**

Companies average

5

Private and Public clouds

Migrate from public cloud

**Security,
Performance,
Cost,
Control**

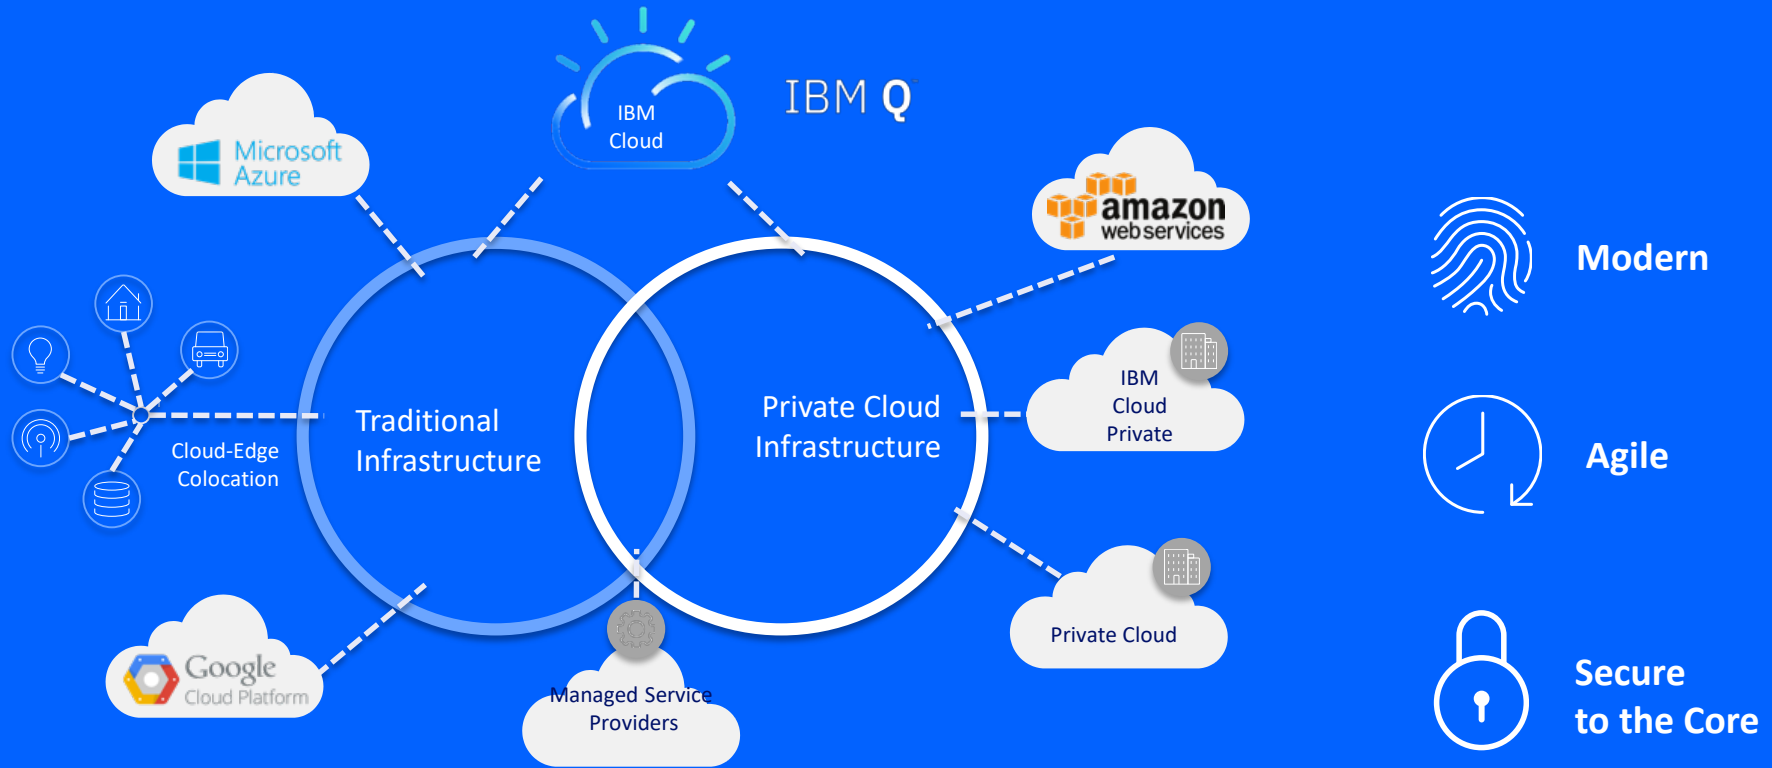

IDC Survey

80% of
companies moved
applications or
data from Public
Cloud in 2018

IDC Survey

98% of
companies will use
**Hybrid
Multiclouds
in three years**

THE Data-Driven Hybrid Multicloud Enterprise

Storage challenges

Old

65% Cut infrastructure costs

59% Avoid vendor lock-in...

...Avoid data stored with different vendors' technologies in silos across the enterprise.

59% Improve latency

New

Storage connectivity in the hybrid multicloud era matters. Storage must connect to a hybrid multicloud world

Storage location in hybrid multicloud matters depending on data security, regulatory environments, performance, and availability requirements.

Speed of adoption matters. NVMe, storage class memory (SCM), software-defined storage (SDS)

Flash Storage - Your Cloud foundation

- **Flash performance**
 - Latency
 - IOPS
 - Bandwidth
- **Resiliency**
 - Wear leveling
 - Lower failure rate than HDD
 - Media guarantees on longevity
- **Advanced technology architectures and innovation**
 - NVMe integration: across fabrics and in arrays
 - Continual Flash advancements: EG. 3D QLC
 - Integration with other technologies: persistent memories
- **Availability**
 - Storage systems at Seven 9's and greater
 - Storage software: replication, modern data protection, snap shot, tiering

Storage Software - Your Cloud foundation

Agility

Transparent
Data movement
without system
downtime

Bridge

From traditional
to new
technologies -
Containers and
Kubernetes

Cloud

Storage
solutions that
can be
deployed across
Hybrid
Multicloud

Data reduction

Store more data
on the storage
you already own

Encryption

Cyber resiliency
by encrypting
data at rest and
inflight for cloud
tiering

IBM Spectrum Virtualize

Agility

Transparent
Data movement
without system
downtime

Bridge

From traditional
to new
technologies

Cloud

Storage solutions
deployed across
hybrid multicloud
environments

Data reduction (guaranteed)

Reduction
up to 5:1

Highest
performance
2:1 with IBM
FlashCore

Encryption

Encryption – at
rest and in flight -
regardless of
vendor

FIPS 140-2 with
IBM FlashCore

Storage cloud use cases

Business Continuity

leveraging public cloud resources

DevOps Analytics

Temporary data copies from on-prem to cloud

Workload migration

Transparent data migration to cloud

Hybrid multicloud

Operating infrastructure both on-prem and in public cloud

Infrastructure-independent storage for hybrid multicloud

Private Cloud

Public Cloud

APIs and Orchestration

AI-infused Storage Management

Storage as a Service

Data storage and mobility

IBM Storage Utility

Cloud storage

Protects clients' mission-critical applications and data in a multi-tenant private cloud

Frees 3 FTEs from software development and maintenance tasks

Saves 2 FTEs in backup operations, enable staff to focus on value-add opportunities

7,500 VMs will be protected across complex, multi-tenant private cloud

Solution Components:

[IBM FlashSystem 9110](#)

[IBM Spectrum Virtualize](#)

[IBM Spectrum Protect Plus](#)

[Storwize V5000](#)

Embracing flash storage to enhance data-driven municipal services

Up to 50% shorter application response times, helping Fosen IKT meet stringent SLAs

29% data compression, reducing storage requirements and enabling data growth

Cuts power consumption, delivering operational cost-savings

Solution Components:

[IBM FlashSystem 9110](#)

[IBM Spectrum Virtualize](#)

IBM Storage Leadership and Flash Memory Summit Awards

Artificial Intelligence

2016 FMS

Cybersecurity demonstration, that included **IBM's FlashSystem 900** and **SparkCognition** cybersecurity software *utilizing IBM Watson AI*, named the recipient for **"Most Innovative Flash Memory Business Application."**

Unstructured Data

2017 FMS

NVMe over Fabrics demonstration that included **IBM's Spectrum Scale**. This solution can deliver **15 million IOPS at a latency of around seven microseconds**, named the recipient for **Most Innovative Flash Memory Business Application**.

Structured Data

2018 FMS

"Customers demand new levels of performance, data reduction and ROI from their storage investments," "We are proud to recognize the IBM FlashSystem 9100, which delivers unmatched performance with 100µs latency, 2.5M IOPS and 34GB/sec bandwidth and up to 5:1 data reduction through block-level deduplication, hardware-based compression technology, SCSI UNMAP support, pattern matching, and thin provisioning for an impressive cost effective storage solution."

Jay Kramer, Chairman of the Awards Program and President of Network Storage Advisors Inc.
